

PAV011- 023

DUO

434.15 MHz transmitter

PLUS PLUS

- 1 channel to control at the same time one or several automations
- Possibility to enable/disable the sun sensor on remote control units and motors with built-in control unit
- Internal dip-switch to program the functions of the SCREEN control units and of the tubular motors with built-in control unit

MODEL	CODE
DUO	10T001 PAV011

DUO LUX

1 channel 434.15 MHz transmitter. Auxiliary light and sun sensor control

PLUS PLUS

- 1 channel to control at the same time one or several automations
- Dedicated button to control an auxiliary light by means of the CUS control unit or the DEV-R2 module
- Possibility to enable/disable the sun sensor on remote control units and motors with built-in control unit
- Internal dip-switch to program the functions of the SCREEN control units and of the tubular motors with built-in control unit

MODEL	CODE
DUO LUX	10T007 PAV111

DUO4

4 channel 434.15 MHz transmitter. Auxiliary light and sun sensor control

PLUS PLUS

- 4 channels to control at the same time one or several automations
- Dedicated button to control an auxiliary light or to enable/disable the sun sensor on remote control units and on the motors with built-in control unit
- Internal dip-switch to program the functions of the SCREEN control units and of the tubular motors with built-in control unit

MODEL	CODE
DUO4	10T004 PAV014

DU06

6 channel 434.15 MHz transmitter

PLUS PLUS

- 6 channels to control at the same time one or several automations
- Multiple groups function to program up to 8 groups of automations
- Possibility to enable/disable the sun sensor on remote control units and motors with built-in control unit
- Internal dip-switch to program the functions of the SCREEN control units and of the tubular motors with built-in control unit

MODEL	CODE	
DU06	10T003	PAV016

DU012

12 channel 434.15 MHz transmitter

PLUS PLUS

- 12 channels to control at the same time one or several automations
- Multiple group function to program up to 8 groups of automations
- Possibility to enable/disable the sun sensor on remote control units and motors with built-in control unit
- Internal dip-switch to program the functions of the SCREEN control units and of the tubular motors with built-in control unit

MODEL	CODE	
DU012	10T034	PAV022

DU012-D

12 channel 434.15 MHz transmitter with display and timer function

PLUS PLUS

- 12 channels to control at the same time one or several automations
- Multiple group function to program up to 8 groups of automations
- Possibility to program up to 5 events/day
- Automatic or manual operation
- Time and environment temperature display
- Internal dip-switch to program the functions of the SCREEN control units and of the tubular motors with built-in control unit

MODEL	CODE	
DU012-D	10T035	PAV023
