

CLASSIC TIMER

STU131

Roller shutter control to fit into the former belt-take up reel in similar RAL 9016 with a day program and random function. Easy control with large buttons and display.

With connecting the optional lux sensor, measuring the lux value on the window, the roller shutter can be driven automatically to the desired position.

Commande manuelle ou automatique, programmation journalière/hebdomadaire, fonction astro, connexion détecteur bris de vitre et capteur solaire

Handmatige of automatische sturing, dag/week, programmatie klok, astro-functie, aansluiting glasbreukmelder en zonnensensor
