New family of self-protected electronic sirens

This new series of sirens has been studied in features to get all the requirements of a professional installation. The new design has been projected in modern and elegant shapes. The particular line of the design is allowing a distinction of this siren compared with the others present on the market. Is also reserved a big space for the installer logo to personalize the cover.

All ALT352 are individually 100% computer tested in order to grant the usual reliability.

TECHNICAL DATA
