

Consoles and control units

Transponder readers

The electronic key has always been the most classic and practical control device for security systems. The transponders of Tecnoalarm guarantee the highest standard of unbreakability of the code and the highest number of possible combinations.

The transponder readers can only be used in conjunction with interfaces TP PK, TP PROX, TP SKN and TP K&N, on all Tecnoalarm systems which provide for their use.

ATPROX/I

Approved for homologated control units

Reader of transponders PROXKEY. Module for flush mounting for frames Vimar series IDEA*. Black.

Item no. F103ATPROX/I

ATPROX/L

Approved for homologated control units

Reader of transponders PROXKEY. Module for flush mounting for frames BTicino series Living*. Black.

Item no. F103ATPROX/L /ATA320

ATPROX/LINT

Approved for homologated control units

Reader of transponders PROXKEY. Module for flush mounting for frames BTicino series Living International*. Black.

Item no. F103ATPROX/LINT

ATPROX/LINB

Approved for homologated control units

Reader of transponders PROXKEY. Module for flush mounting for frames BTicino series Living International*. White.

Item no. F103ATPROX/LINB

ATPROX/MN

Approved for homologated control units

Reader of transponders PROXKEY. Module for flush mounting for frames BTicino series Magic*. Black.

Item no. F103ATPROX/MN

ATPROX/M

Approved for homologated control units

Reader of transponders PROXKEY. Module for flush mounting for frames BTicino series Magic*. White.

Item no. F103ATPROX/M
