

SENSIVA-180

Wall-mounted photocells adjustable (180°) and synchronised

FOT280

Product advantages

- **Adjustable** up to 180° on the horizontal axis and 30° on the vertical axis
- **Synchronised:** the synchronism circuit allows the installation of two pairs of very close photocells, without them interfering with one another
- **Secure:** immune to interference from sunlight
- **Maximum sturdiness:** shockproof polycarbonate body
- **Adhesive filter** to simulate adverse weather conditions and ensure optimum operation of the system

Dip-switches to enable synchronized operation and the snow function

LED indicator to simplify the alignment of the photocells

Ball to orient the photocell

Technical features

Optical range	25 m
Dimensions	115x41x38 mm
Power supply	12÷24 Vac / 12÷36 Vdc
Relay contact	1A max 30 VDC
Operating temperature	-20° + 60° C
