

GARAGE DOOR MONITOR

Open, close and monitor
your garage door **from anywhere**

A single remote for your daily life

GDM002 is a simple and elegant Wi-Fi/IP device used to remotely operate and monitor your garage door and gate from a smartphone, tablet, PC or Apple Watch by **Wifi, 3G & 4G**.

Through the use of compatible sensors, both in wireless and wired version, GDM002 will send you **real time alerts** when door is open, closed or left open via email or native Smartphone notifications, even if you are far away from home.

The app will redefine the way you interact with your garage door or gate. It will integrate all your existing remote controls in just one place, making your life easier and more convenient.

GDM002 will integrate your **IP camera** in a single app for you to remotely operate, monitor and watch your garage door or gate from a single place.

The GDM002 **video feature** will allow you to see in real time what happens in your garage when your door is open, closed or left open. You will also be able to watch past events as the system will automatically record up to 1GB worth of events.

Technical info

Connectivity: Wi-Fi IEEE 802.11 b/g/n
Power Supply: External 110-240V AC to 5V2A
SD Card: Micro SDHC 8GB class 10
RF: 2.4Ghz GFSK 150ft
Output: 3 independent relay outputs
Input: 3 input for wired sensor (screwed-in)
Dimensions: 4.5"Lx4.5"Wx4"H
Weight: 0.86lbs (incl. sensor)

Universal

For alle automated access.
Compatible with most garage door openers
and all gate operators.
