

## Network Range Softwares: PROS Plus and BioManager

### PROS Plus

|                                               |                                                                                                                     |
|-----------------------------------------------|---------------------------------------------------------------------------------------------------------------------|
| Compatible with:                              | <b>Windows 8, Windows 7, Windows Vista, Windows server 2008, Windows server 2003, Windows XP</b>                    |
| Maximum number of controllers EWS & EWSi:     | <b>Unlimited</b>                                                                                                    |
| Maximum number of doors:                      | <b>Unlimited</b>                                                                                                    |
| Maximum number of sites:                      | <b>Unlimited</b>                                                                                                    |
| Maximum number of management PC:              | <b>1 or unlimited through TeamViewer software</b>                                                                   |
| Database:                                     | <b>Microsoft Access or SQL</b>                                                                                      |
| Anti-passback:                                | <b>Yes; Timed APB; APB per User</b>                                                                                 |
| Mantrap Function:                             | <b>Yes</b>                                                                                                          |
| Door Open by multiple cards:                  | <b>1 to 8 cards</b>                                                                                                 |
| Activation of several relays from one reader: | <b>Yes</b>                                                                                                          |
| Remote Relays activation:                     | <b>All the relays</b>                                                                                               |
| Readers Wiegand Protocole:                    | <b>26, 34 Bits and customized Wiegand</b>                                                                           |
| Number of access levels:                      | <b>Unlimited</b>                                                                                                    |
| Number of Time Zones:                         | <b>24 per EWS, unlimited per system</b>                                                                             |
| Number of Departments:                        | <b>Unlimited</b>                                                                                                    |
| Number of Holidays:                           | <b>32</b>                                                                                                           |
| Easy Programming:                             | <b>A scanner allows to find all the controllers and biometric readers on one or several communication portal(s)</b> |
| Reports:                                      | <b>Preset and Configurable, export to PDF,XLS,CSV,XML,HTML,RTF,TXT...</b>                                           |
| Send reports by mail:                         | <b>Yes</b>                                                                                                          |
| Events visualisation:                         | <b>Chronological order</b>                                                                                          |
| XPR Biometric Readers:                        | <b>Biometric readers programming and users fingerprint management integrated in software</b>                        |
| T&A calculation:                              | <b>Yes</b>                                                                                                          |
| Web report server:                            | <b>Yes</b>                                                                                                          |
| Automatic evacuation printing:                | <b>Yes</b>                                                                                                          |
