

Controller

CAM800

3-AXIS DIGITAL
MULTI-POINT
CONTROLLER KEYBOARD

The new AU-KB3N multi-point, programmable digital controller combines all video surveillance equipments in to a single system: you can control PTZ, Multiplexer, DVR from this keyboard. It can also memorizes the protocol of every attached device, and switch automatically once the PTZ or speed dome is selected, without any additional changes on user's side.

The Ergonomic design and 3-Axis keyboard for PTZ-function provides a user-friendly and quick operation.

Highlights

- Controls Speed-Dome, zoom camera, DVR, Matrix and PTZ
- Auto-Switching (pre-programming) multiple protocols for every device
- 3-Axis stick for pan/tilt/zoom movement simultaneously
- Variable speed control for pan/tilt movement
- Large, back-lighted LC display for a clear over-view and menu setup
- Programming of devices
- Direct access to preset and tour recall via short-cut keys
- Menu assistant for easy sequence setup with preset no., Speed and duration
- Activation control for auxiliary camera functions: e.g elec. Flip, AGC, BLC., Ect.
- Multiple controlling protocols over RS-485/RS-232
- Ergonomically Design
- Aluminium finishing

Specification

Model	CAM800
Transmission/receiver	EIA / RS-485 / RS-232, Half-Duplex
Baud rate	2400 / 4800 / 9600 / 19200 Baud, Protocol dependent
Wiring distance	Max. 1200 m (RS-232), Max. 20 M (RS-485)
Power supply	9V - 12V DC , 500mA
Temperature	-5°C to 40°C
Humidity	Under 90%
Dimension	158 x 250 x 60 mm
DVR Protocol	Hik, Tumin, Mitsu, DH, VC, DSCP
Camera Protocol	Pelco-D, Pelco-P, B01, Panasonic, Samsung, DM, Li-Lin, CBC, VCL, Mikami, Mikami330
Multiplex Protocol	Sony, Bosch, Pelco, Robot, VC
