

SERIAL CODELOCKS "SLIM SERIES"

The "Slim Series" codelocks are designed to be installed where space is limited. The body of the codelock is manufactured from one piece die cast aluminium, which greatly improves the code-locks resilience to vandalism and misuse, giving increased reliability. All models are for surface mounting and are available in either a square or rounded shape, with two different finishes: nickel (order adding "/N" to the product code) or gold (order adding "/G"). These codelock units must be connected to one of the following Videx Central Control Units: VX1000B, VX1010-1 or VX1010-2, depending on how many user codes or relay outputs are required. Working temperature: -10 +50°C.

Art.	DESCRIPTION
VX1020/N	Square shape, nickel colour.
VX1020/G	Square shape, gold colour.
