

**VX 2400LP v.3**

Surface

**HQMAG**

VX2400LP supplied with  
security bracket (AMSP)

**VORTEX**

MGV240

**VX 2400LP v.3**

**Main features**

**15000N Range**

|                                          |                                                                                              |
|------------------------------------------|----------------------------------------------------------------------------------------------|
| <b>Mounting</b>                          | Surface                                                                                      |
| <b>Holding Force real tested</b>         | ~15020N/~3371lbf/1502kgf                                                                     |
| <b>Voltage</b>                           | 12VDC / 24VDC                                                                                |
| <b>Current</b>                           | 240/120mA                                                                                    |
| <b>Locking monitoring</b>                | Long distance LED + small LED + Relay                                                        |
| <b>Door position monitoring</b>          | Reed                                                                                         |
| <b>Early Warning Alarm EW technology</b> | Fitted with EW pressure sensors and buzzer able to send an alarm before access forced opened |
| <b>Early Warning Alarm EW outputs</b>    | 1                                                                                            |
| <b>NF S61937 (DAS for France)</b>        | Yes                                                                                          |
| <b>Corrosion Proof</b>                   | Salt spray test.<br>ISO 9227, ASTM B-117 90                                                  |
| <b>NO magnetism residual</b>             | No need armature plate push button to release the door                                       |

|                                      |     |
|--------------------------------------|-----|
| <b>Built-in MOV Surge Protection</b> | Yes |
|--------------------------------------|-----|

**Mechanical features**

|                                             |                                  |
|---------------------------------------------|----------------------------------|
| <b>Dimensions (LxWxH)</b>                   | 218 x 35.5 x 30mm                |
| <b>Weight</b>                               | ~1,3kgs                          |
| <b>AMSP Armature Plate Security Bracket</b> | AMSP2400 included (see brackets) |

A universal magnet of a very small size fitted with a conical orifice which confines a very strong alloy pin within a vortex of magnetic and mechanical force.
