INFRARED BEAM PHOTOCELL GHOST 40

(cod. 23102070)

General

The 23102070 photocell has been designed to be compact and to provide speed of installation, operation and durability. Unit size: (57x85x33 mm). The high resistance acrylic plastic provides classic styling plus the strength required to stand the test of time.

The 23102070 Photocell Kit Consists of:

- 1 No. 23102070 Photocell Receiver
- 1 No. 23102070 Photocell Transmitter
- 1 No. Fixing Kit
- 2 No. cover-screw cap
- 1 No. Set of fitting instructions

Technical Characteristics	
Range:	15 m (exterior use)
Signal:	Modulated infrared
Wave length:	880 nm
Modulation Frequency:	1000 Hz
Supply Voltage:	12 - 24 Vac/Vdc
Absorbed Current:	Tx: 30 mA Rx: 30 mA
Temp. Operating Range:	-15° C / +60° C
Relay Contact Rating:	1A max @ 24V
Humidity:	from 5% to 90% no condensation

INSTALLATION

Transmitter

- Feed the cable in through the back of the unit and make connections as shown in figure 2.
- Adjust the cable within the unit to eliminate any surplus.
- Fix the unit as shown in figure 3.
- Seal the cover & cable entry to prevent insect infestation.

Receiver

- Feed the cable in through the back of the unit and make connections as shown in figure 2.
- Adjust the cable within the unit to eliminate any surplus.
- Fix the unit as shown in figure 3.
- Take care in positioning, verify the alignment and height will be the same as that of the transmitter.
- Seal the cover & cable entry to prevent insect infestation.

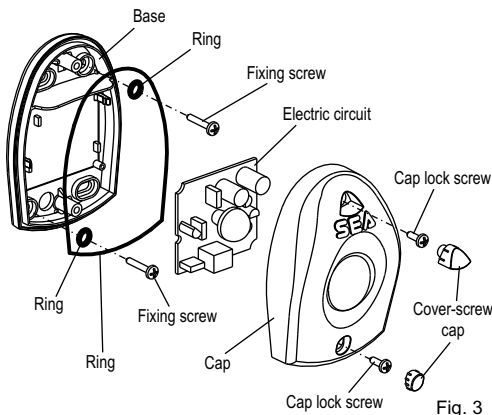

Fig. 3

Operational set-up and testing

- Power-up the photocells (12-24 Volts ac/dc).

Please Note: The correct working of the 23102070 photocell is indicated by the red led being lit.

Operational Verification

Fit one of the black plastic photocell covers complete with an opaque diffuser label stuck across the lens.

- Check that the relay works correctly.
- Check that the red led goes out when the beam is broken.

Red led Function:

RED LED LIT: 23102070 CORRECTLY ALIGNED. NORMAL QUIESCENT STATE.

RED LED UNLIT: 23102070 INCORRECTLY ALIGNED OR BEAM INTERRUPTED.

SPARE PARTS

To obtain spare parts contact:

SEA s.r.l. - Zona Ind.le, 64020 S.ATTO - Teramo - Italia.

INTENDED USE

The 23102070 photocell is specifically designed for use in the automatic gate industry to provide automatic gates or traffic barriers with hold open safe.

ENVIRONMENT

Please dispose of this product packaging in a responsible, appropriate way.

CONFORMITIES

The 23102070 photocell conforms to the following:

89/336/CEE (Act on the Electromagnetic Compatibility)

STORING

STORAGE TEMPERATURES			
T _{min}	T _{max}	Humidity _{min}	Humidity _{max}
-20 °C	+70 °C	5% no condensation	90% no condensation

When being transported this product must be properly packaged and handled with care

CLEANING AND MAINTENANCE

Cleaning and maintenance of this unit must be carried out at 6 monthly intervals by authorised, qualified personnel.

During routine maintenance the following checks should be made: Correct alignment, sealing, cleanliness of the lenses and internal components. Any remedial work should be carried out as required.

DECOMMISSIONING

If the 23102070 photocell is to be taken out of service, this work must only be undertaken by authorised, qualified personnel.

LIMIT OF GUARANTEE

The 23102070 photocell is guaranteed for a period of 24 months. The guarantee period starts from the date stamp printed on the product. The guarantee will be void if the photocells have been incorrectly installed, not used for the purpose intended, tampered with or modified in any way. The validity of this guarantee only extends to the original purchaser.

NOTE: THE MANUFACTURER CAN NOT BE DEEMED RESPONSIBLE FOR ANY DAMAGE OR INJURY CAUSED BY IMPROPER USE OF THIS PRODUCT.

SEA reserves the right to do changes or variations that may be necessary to its products with no obligation to notice.
